

COMMUNITY BBQ AND GRILL POLICY

Community Adherence to recommended best practices by Local Fire Districts restricts the use of barbecues in and around apartments as follows:

- Charcoal cooking devices are strictly prohibited on combustible patios or balconies, or within 25 feet of combustible construction.
- Our community also prohibits the use of gas/propane cooking devices with a gas container larger than 2.5 pounds water capacity or 1 pound LP-gas capacity. Allowed devices are the small “Coleman” style propane canisters. These canisters are typically green and are approximately the size of a one liter drink container (you can also find converters for your gas/propane grill to work with these smaller canisters, if you are unsure where to find these please inquire with your management/maintenance team).
- Management respectfully requests that all residents carefully comply with these, safety-sensitive regulations by restricting barbecues to only those devices that use the Coleman-style propane canisters mentioned above.

If you have further questions, please contact your site manager during regular business hours.
